-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-42, 45 and 46, drawn to a method for processing signals having wanted and unwanted components using adaptive filters in the time domain and further processing in the frequency domain.

Group II, claim(s) 43, drawn to a method for calculating a spectrum from a coupled signal comprising a target signal and an interference signal.

Group III, claim(s) 44, drawn to a method for calculating a reverberation coefficient from respective signal channels of a sensor array.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each group has a different special technical feature not shared by the remaining groups. Group I is directed to a method for processing signals having wanted and unwanted components using adaptive filters in the time domain and further processing in the frequency domain. Group II is directed to a method for calculating a spectrum from a coupled signal comprising a target signal and an interference signal. Group III is directed to a method for calculating a reverberation coefficient in respective signal channels of a sensor array.

3. A telephone call was made to Leslie Paperner on 9/28/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
